**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-33, drawn to a digital security camera, classified in class 375, subclass 240.01.
- II. Claims 34-40, drawn to a method of monitoring, classified in class 348, subclass 143.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as use as a web cam, or any number of monitoring functions, not associated with security systems, such as video capture of a local sporting event, or community function. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Richard Ruble on 9/10/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2613

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
